Office Action Summary	Application No. 10/782,147	Applicant(s) WRIGHT, GREGORY M.	
	Examiner Nasser G. Moazzami	Art Unit 2187	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-25 are rejected under 35 U.S.C. 102(e) as being anticipated by Wright (US Patent No. 6,859,868)

The applied reference has a common assignee with the instant application.

Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

As per claims 1-25, Wright teaches a computer system, an apparatus and its method for supporting directory-based cache coherence in an object-addressed memory hierarchy in a computer system **[cache coherency protocols (column 6,**

lines 2-3); object cache (column 2, line 54); object-addressed memory hierarchy (column 3, lines 35-36)], comprising: receiving a cache-coherence transaction for a cache line; if the cache line is an object-addressed cache line, using a corresponding object identifier and an offset to look up directory information specifying where copies of the object-addressed cache line are located in the caches in the computer system **[object address includes an ID and an offset (column 3, line 52); object ID and a portion of the offset are used to locate a cache line (column 2, lines 41-43)];** and using the directory information to perform the cache-coherence transaction; if the cache line is a physically-addressed cache line, using a corresponding physical address to look up directory information specifying where copies of the physically-addressed cache line are located in the caches **[non-object request (column 4, line 9)];** a controller that resides between main memory and caches in the computer system; flushing and/or invalidating copies of the cache line **[eviction of a cache line];** performing a hash lookup **[encoding];** a translator that translates between object identifier and physical addresses **[translator 36];** and caches include one or more levels of caches **[L1 and L2].**

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See attached PTO-892.
